

CONTENTS

Overview

M. Sugita, J. Asanuma, M. Tsujimura, S. Mariko, F. Kimura, D. Azzaya, and Ts. Adyasuren

The Rangelands Atmosphere–hydrosphere–biosphere Interaction Study Experiment in northeastern Asia (RAISE).....73

Climate and Meteorology

T. Sato, M. Tsujimura, T. Yamanaka, F. Kimura, H. Iwasaki, A. Sugimoto, M. Sugita, G. Davaa, and D. Oyunbaatar

Where does precipitation water comes from?.....75

H. Iwasaki and T. Nii

The break in Mongolian rainy season and the relation with the stationary Rossby wave along the Asian jet.....76

H. Iwasaki

Study on influence of rainfall distribution on NDVI anomaly over the arid regions in Mongolia using an operational weather radar.....77

H. Iwasaki, T. Sato, T. Nii, F. Kimura, K. Nakagawa, I. Kaihotsu and T. Koike

Diurnal variation of convective activity and precipitable water around Ulaanbaator, and impact of soil moisture on convective activity in the nighttime.....78

Hydrologic Cycle

M. Tsujimura

How old is groundwater in Kherlen River basin?80

M. Tsujimura

Where does Kherlen River water come from?81

M. Tsujimura

How much groundwater is available in a well?82

T. Yamanaka, M. Tsujimura, D. Oyunbaatar, and G. Davaa

Precipitation over Mongolia may provide good isotopic thermometers.....	83
---	----

Atmosphere-surface Interaction

J. Asanuma

Measuring atmospheric heating of landsurface using shimmer.....	85
---	----

A. Kotani and M. Sugita

Heat transport from the ground to the atmosphere estimated by airplane data.....	86
--	----

D. Matsushima

Soil moisture estimated from satellite data.....	87
--	----

Ecosystem

M. Asano, K. Tamura, K. Kawada, and T. Higashi

Characteristics of grassland soil of the northeastern Mongolia.....	89
---	----

K. Kawada, T. Urano, G. Lee, S. Mariko and T. Nakamura

Species composition of grassland in central Mongolia.....	90
---	----

S.-G. Li, M. Tsujimura, A. Sugimoto, G. Davaa, and M. Sugita

Vegetation recovery from abandoned vehicle tracks.....	92
--	----

S. Mariko, T. Urano, and K. Kawada

Vegetation and grazing impact in a Mongolian grassland.....	93
---	----

H. Kato, T. Urano, S. Mariko, and M. Sugita

Influence of grazing on grassland water and energy balance.....	94
---	----

S.-G. Li, J. Asanuma, A. Kotani, T. Urano, M. Sugita, G. Davaa, D. Oyunbaatar

Productivity of grassland in central Mongolia.....	95
--	----

Hydrologic Cycle and Ecosystem

H. Iwasaki

Impact of interannual variability of meteorological parameters on vegetation activity over Mongolia.	97
---	----

<i>D. Matsushima, I. Byambakhuu, Y. Matsuura, M. Saandar, Ts. Adyasuren, and M. Sugita</i> Vegetation phenology refined.....	98
<i>S.-G. Li, M. Tsujimura, A. Sugimoto, G. Davaa, and M. Sugita</i> Larch trees use deeper soil moisture under water shortage.....	99
<i>T. Urano, S. Mariko, J. Asanuma, M. Sugita, and T. Oikawa</i> Ecosystem function and water condition in a semi-arid grassland.....	100
<i>Y. Onda, H. Kato, Y. Tanaka, M. Tsujimura, G. Davaa, and D. Oyunbaatar</i> Soil erosion rate on Mongolian grassland.....	101
Future Prediction	
<i>T. Sato and F. Kimura</i> How change in rainfall in Mongolia after global warming.....	103
<i>Y. Chen, G. Lee, P. Lee, and T. Oikawa</i> Grazing effect on above-ground biomass and above-ground net primary production of a Mongolian grassland ecosystem.....	104
<i>Y. Chen, G. Lee, P. Lee, and T. Oikawa</i> Root response to grazing of a Mongolian grassland ecosystem.....	105
<i>G. Lee, P. Lee, S.-G. Lee, T. Urano, M. Sugita, and T. Oikawa</i> Estimation and forecast of carbon/water cycles in a Mongolian Ecosystem.....	106
